

Moving towards water and peace

By supporting local, regional and international stakeholders, WPS aims to prevent and reduce water-related conflict and turn the vicious cycle of water challenges and instability into a virtuous one of sustainable water management and peace.

MOVING TOWARDS WATER AND PEACE

Water insecurity threatens people, communities, ecosystems, and nations, impacting cooperation, stability, and peace. The Water, Peace, and Security (WPS) partnership aims to prevent and mitigate water-related conflicts, turning risks into opportunities for cooperation through conflict-sensitive water management.

WPS 2025 - 2030

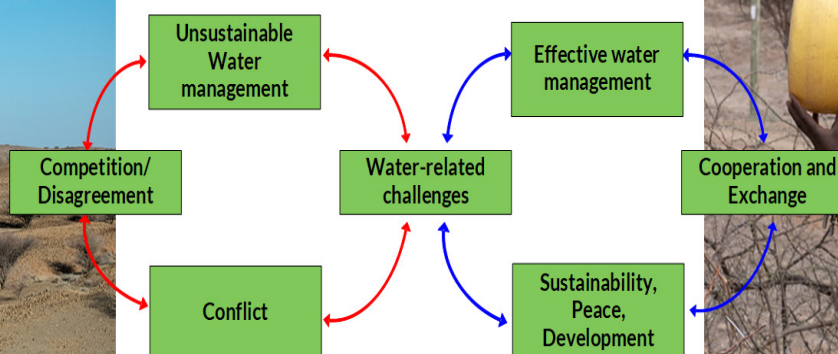

WPS plans to enhance outcomes in these regions and expand its operations to other countries in Africa and the Middle East, in the next phase. Future plans include developing new tools and datasets to support the mitigation of water conflicts at national and transboundary levels.

INTERESTED?
